

Identifying Invasive Non-Native Plants

Key Features

- ✓ Understand the growth and spread of high-profile Invasive Non-Native Plants (INNP) and the problems they cause
- ✓ Identification of high-profile INNP, including all forms of Japanese Knotweed in a range of different circumstances
- ✓ The legal framework in England and Wales relevant to UK INNP
- ✓ Effective inspection techniques to establish the presence of INNP
- ✓ Training material delivered by leading authority on non-native plant species
- ✓ Provides in-depth training with assessment to demonstrate knowledge attained

Who is the qualification designed for?

- ✓ Professionals working in land and property management, maintenance and contracting etc.
- ✓ Members of RICS and other professional bodies such as CIOB and CABE who provide valuations and survey reports for homeowners and lenders

Objectives

- ✓ Understand how invasive non-native plants arrived in the UK and why they differ to native plant species
- ✓ Understand high-profile invasive plants, focussing on key UK invasive plant species
- ✓ Be able to discriminate between Japanese Knotweed varieties and native plants in real world conditions
- ✓ Understand effective inspection techniques to establish and record the presence or otherwise of invasive non-native plant species

How is the qualification delivered?

The training programme is delivered through Sava Learn, our online learning platform. This gives you complete flexibility as to where and when you undertake your learning. The training material is developed by Dr. Dan Jones from Advanced Invasives, an Honorary Researcher at Swansea University. Dan is a leading authority on non-native plant species.

You can enrol on this course at any time and work through the content at your own pace.
