Sava are delighted to confirm we will be exhibiting at CIH Housing 2021 at Manchester Central on 7th – 9th September.

We are excited to return to the Chartered Institute of Housing's annual conference after 18 months of virtual working, for a much-needed regroup and to promote and support the efforts of individuals and the resilience of the sector in response to the recent pandemic.

With over 8,500 attendees, 10 theatres, 500+ speakers, and 400+ sponsors and exhibitors over the three days, it is the biggest meeting place for the whole housing sector.

As well as being an exhibition covering the entire housing supply chain, Housing 2021 aims to delve in to those big discussion points on it's Unlock Net Zero stage such as the NetZero climate emergency, the impact of the Social Housing White Paper, and the truth around delivering new, affordable homes for a low carbon future.

If you would like to chat with us face to face about your organisation's decarbonisation challenge and how Sava's software solutions can provide you with insight and improvement planning for zero carbon, come and find us at stand C24.
